

# WAAAYB Organics

## HEMP EXTRACT SUPPLEMENT

## What is hemp oil?

Hemp is very rich in Cannabidiol (CBD), one of the therapeutic components of cannabis. Unlike marijuana, hemp contains very little THC (the psychoactive component), so pets do not “get high” from these products. The benefits of CBD are profound and the distillation available through our office can be used in conjunction with any other medications, herbs or supplements.

Inflammation and oxidative damage are two of the biggest contributors to disease progression and health disorders. By fighting both, CBD can be a useful tool for the treatment of a great many medical conditions.

WAAAYB Organics CBD Oil for Pets is made from USDA certified organic hemp grown on family farms. The high CBD plants are hand harvested and a toxin-free CO<sub>2</sub> extraction is used to ensure the cannabinoids aren't altered by solvents. Independent third party testing is performed to ensure the purity and potency of each batch.

### Benefits of CBD

- Inhibits cancer cell growth
- Preserves neurologic health
- Reduces seizures and convulsions
- Promotes healthy sleep
- Regulates blood sugar levels
- Reduces inflammation
- Suppresses vomiting and nausea
- Combats anxiety and depression
- Relieves pain
- Improves immune function
- Promotes healthy digestion

### A few scientific studies on the effects of CBD:

- ⇒ Researchers at California Pacific Medical Center concluded CBD could inhibit activity of cancer cells, controlling the spread of diseases like breast cancer, leukemia and colon cancer.
- ⇒ Stanford University Department of Neurology found that patients with treatment-resistant epilepsy reported an 80% reduction in seizure frequency with CBD.
- ⇒ When assessing chemotherapy-induced vomiting and nausea, cannabis extract provided excellent protection in over seventy percent of cancer patients
- ⇒ A study at the Institute of Neurosciences in Spain determined that CBD-based medications controlled pain better than traditional medications
